***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the allowability in combination with the other claimed features is because nowhere in the prior art is there a monolithic transmission line capacitor having each of the capacitor height, the spacing distance and the first dielectric material are selected to yield a predetermined capacitor-signal-path to capacitor-signal-path impedance for the monolithic transmission line capacitor. Regarding claim 13, the allowability in combination with the other claimed features is because nowhere in the prior art is there a channel formed within the spacing distance, the channel being characterized by a channel width and filled with a second dielectric material. Regarding claim 24, the allowability in combination with the other claimed features is because nowhere in the prior art is there a monolithic transmission line capacitor wherein the width of the spacing is substantially equal to the distance between two external signal paths connected to respective of the first terminations of the adjacent multilayer capacitors.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
